

AHMAD GILBRAN AL ANSHARY

Kediri, East Java, Indonesia | Phone: 085946300565 | Email: yantobangsa56@gmail.com

TARGET POSITION

Telecommunication Technician | Fiber Optic Technician | FTTH Technician

PROFESSIONAL SUMMARY

Experienced Fiber Optic Technician with 3 years of hands-on experience in FTTH network maintenance, fiber optic troubleshooting, fiber splicing, and optical network testing. Proficient in using OTDR and Optical Power Meter (OPM) to identify, analyze, and troubleshoot fiber optic network issues.

Experienced in performing preventive and corrective maintenance, identifying network faults, and supporting the reliability and quality of telecommunication infrastructure. Holds a MikroTik Certified Network Associate (MTCNA) certification and has demonstrated technical excellence through achievements in the LKS competition at both regency and provincial levels.

Highly motivated, technically oriented, and capable of working independently or as part of a team in field-based telecommunication operations.

CORE COMPETENCIES

- Fiber Optic Network Maintenance
- FTTH Network Installation and Maintenance
- Fiber Optic Troubleshooting
- Fiber Optic Splicing
- OTDR Testing and Fault Analysis
- Optical Power Measurement
- Optical Power Meter (OPM)
- Preventive and Corrective Maintenance
- Network Fault Identification
- Fiber Optic Link Testing
- Technical Problem Solving
- Field Technical Operations

PROFESSIONAL EXPERIENCE

PT. Jatara

Fiber Optic Technician | 3 Years

- Performed preventive and corrective maintenance on FTTH and fiber optic networks to support network reliability and service continuity.
- Conducted troubleshooting and fault isolation on fiber optic networks to identify the root cause of service disruptions.
- Performed fiber optic cable splicing to restore and maintain network connections.
- Utilized OTDR to perform fiber optic link testing, analyze traces, and identify potential faults such as high loss, reflection, and abnormal events.
- Used Optical Power Meter (OPM) to measure optical power levels and evaluate fiber optic link performance.
- Conducted field inspections and network assessments to identify potential issues and maintain network quality.
- Performed corrective actions and network repairs based on technical findings and operational requirements.
- Supported the maintenance and optimization of FTTH infrastructure in accordance with technical procedures and safety practices.
- Worked effectively in field operations and collaborated with team members to complete technical tasks efficiently.

EDUCATION

SMK Muhammadiyah 2 Kota Kediri

Computer and Network Engineering (TKJ)

CERTIFICATION

MTCNA

MikroTik Certified Network Associate

TECHNICAL SKILLS

Fiber Optic: FTTH; Fiber Optic Maintenance; Fiber Optic Troubleshooting; Fiber Optic Splicing; Fiber Optic Link Testing; OTDR Trace Analysis; Optical Power Measurement

Tools and Equipment: OTDR; Optical Power Meter (OPM)

Networking: Basic Network Troubleshooting; Basic MikroTik Networking; Network Maintenance

ACHIEVEMENTS

- 1st Place – LKS Competition, Regency Level
- 2nd Runner-Up / Honorable Mention – LKS Competition, Provincial Level

ADDITIONAL INFORMATION

- Strong analytical and problem-solving skills
- Able to work independently and as part of a technical team
- Willing to work in field-based and operational environments
- Adaptable to technical challenges and changing work conditions
- Committed to maintaining work quality, safety, and operational standards
